Professional Summary

FullStack Software developer with 3+ years of experience building scalable web applications and AI-powered solutions using Java, Spring Boot, React, and AWS. Developed cloud-native microservices and integrated LLM/RAG capabilities (LangChain, Pinecone) to automate workflows and improve search. Analyzed **1M+** security events and built AI projects that cut educator workload by **80%** and improved student learning efficiency by **60%**. AWS triple-certified, with **800+ DSA** problems solved.

Technical Skills

Languages: Java, Python, C, C++, C#, Dart, Kotlin, Objective-C, JavaScript (ES6+), TypeScript,Operating systems
Frontend & Mobile: React.js, HTML5, CSS3, Responsive Design, Web Applications, Mobile Applications, Flutter
Backend: Spring Boot, Node.js, REST APIs, GraphQL, Microservices
Security: JWT, OAuth2, RBAC, OWASP Top 10, HTTPS, CORS, Secure Coding
Databases: PostgreSQL, SQL, MongoDB, DynamoDB, Firebase, Redis
Cloud & DevOps: AWS (EC2, S3, Lambda, ECS, SQS, API Gateway, CDK, CloudFormation), Docker, Kubernetes, CI/CD
Testing & Tools: JUnit, Jest, Unit/Integration Testing, Debugging, Postman, Git, GitHub, Jira, Agile/Scrum, Code Reviews, SDLC
AI/ML & Fundamentals: LLM, RAG, LangChain, LangGraph, Pinecone, Semantic Search, Data Structures, Algorithms, OOPS

Professional Experience

Full-Stack Developer, Citratek Inc. Jun 2025 – Present
Tampa, Florida, USA

- Built and maintained 3 **microservices** with **Node.js** and **TypeScript**, exposing **10 GraphQL** queries and mutations; implemented **OAuth2** and **RBAC** with **Secure Coding** practices (HTTPS, CORS, input validation) aligned with the **OWASP Top 10**.
- Added **Redis** caching and tuned **MongoDB** and **DynamoDB** data access, reducing average response time by about **30%**.
- Deployed services on **AWS** (Lambda, S3, API Gateway, SQS) with **Docker**, **GitHub Actions**, and CI/CD, cutting deployment time by about **40%**.
- Built an AI-powered semantic search feature using **Python**, **RAG**, **LangChain**, and **Pinecone** over 5K+ documents; wrote integration tests with **Jest** (about **60%** coverage) and tracked work in **Jira**.

Junior Software Developer, Corematiq Inc. Jan 2021 – Feb 2023
Hyderabad, India

- Developed and maintained **4** web application modules using **Java, Spring Boot, JavaScript, HTML5, CSS3** under senior developer guidance, supporting the **SDLC** from requirements gathering to deployment.
- Built and integrated **6 REST APIs** with **Spring Boot**, connecting them to **React.js** front-end components and testing endpoints with **Postman**.
- Optimized **SQL** queries and supported schema design for **3 PostgreSQL** tables, improving data retrieval time by about **20%**; implemented **JWT** authentication for secure login and session management across **2** internal web applications.
- Collaborated in **Agile** sprints, daily standups, and **code reviews** using **Git**; performed **unit testing**, fixed **20+** bugs, and maintained technical documentation.

Cybersecurity Analyst Intern Oct 2021 – Dec 2021
Palo Alto Networks, USA

- Conducted **vulnerability assessments** and **penetration tests** with **Metasploit** on **5** applications and network systems, documenting findings and remediation steps aligned with the **OWASP Top 10**; **25%** of findings were rated high or critical.
- Monitored and analyzed **1M+ security events** using **Wireshark** and system logs, performing **log analysis**, **threat detection**, **threat analysis**, and **root cause analysis**; escalated **35%** as confirmed incidents to support **incident response**.
- Reviewed authentication and access controls (**JWT, OAuth2, RBAC**) and verified **HTTPS** and **CORS** configurations as part of **network security** and **risk assessment** work, recommending **secure coding** fixes for **8 issues** with **75%** of reported vulnerabilities remediated by the end of the internship.

Projects

BridgeAI Learning Platform | AI-Powered Data and Workflow Platform | Live Link

- Built a **Python/LangGraph** orchestration engine chaining 4 agent steps, cutting educator quiz-creation workload by **80%** and failed generations from 15% to 3%; implemented **RAG** with **LLMs** and **Pinecone** over 500+ documents, improving learning efficiency by **60%** and resource discovery by **75%**.

EduFriend | Full-Stack Web and Mobile Application

- Built a **React.js** web app and **Python/Flask** REST APIs **(12 endpoints)** with **Firebase**, plus a **Flutter (Dart)** mobile app with a **Kotlin** module (6 screens) and provisioned **AWS** infrastructure with **CDK/CloudFormation**, deployed **Docker** containers on **ECS**/EC2 for **50+ test users**, and cut API response time by about **30%**.

Smart Hotel Reservation Agent | AI-Powered Web Application

- Built a conversational hotel search assistant with **Python**, **Streamlit**, and **Gemini LLM** via **Google ADK**, handling search, comparison, and booking recommendations and aggregated prices from **4** booking sources and ranked results, cutting manual comparison time by about **50%**.

Education

Master of Science – Information Systems Technologies 2023 – 2025
Wilmington University, USA Grade: 3.8

Certifications & Achievements

- Solved **800+** Data Structures and Algorithms problems across **LeetCode** and **GeeksforGeeks**.
- Completed **10+ Anthropic Certifications**, including **AI Fluency**, **Model Context Protocol (MCP) – Introduction & Advanced**, **Claude with Google Vertex AI**, **Claude Code 101**, **Claude Code in Action**, **Claude Platform 101**, **Agent Skills**, and **Subagents**.
- **AWS Certified: AI Practitioner (AIF-C01) | Cloud Practitioner (CLF-C02) | Developer Associate (DVA-C02)**
